

Geomathematics 2013

Workshop Honouring Willi Freeden's 65th Birthday

15 April – 17 April 2013

in St. Martin/Palatinate, Germany, on top of a vineyard
with a beautiful view of the Upper Rhine Valley

Geomathematics is an emerging new scientific area. Its increasing importance is due to visionary scientists such as Willi Freeden. This workshop is dedicated to the interdisciplinary research of mathematicians and geoscientists. It provides a platform for scientists working in the intersection of these areas to present and discuss novel solutions and open problems. Besides the invited lectures, contributed talks, in particular also by junior scientists, from all areas of the interface of mathematics and the geosciences are welcome.

Keynote Speakers:

- Stephan Dahlke (Marburg)
- Willi Freeden (Kaiserslautern)
- Erik W. Grafarend (Stuttgart)
- Ralf Korn (Kaiserslautern)
- Jürgen Kusche (Bonn)
- Peter Maaß (Bremen)
- Andreas Meister (Kassel)
- Zuhair Nashed (Orlando, FL)
- Nils Olsen (Copenhagen)
- Henning Omre (Trondheim)
- Sergei Pereverzyev (Linz)
- Jürgen Prestin (Lübeck)
- Reiner Rummel (Munich)
- Otmar Scherzer (Vienna)
- Michael Schreiner (Buchs)
- Frederik J. Simons (Princeton, NJ)
- Thomas Sonar (Braunschweig)

Organizing Committee: Geomathematics Group Siegen
