Choice of partner university  
in main language of instruction  
(full sentences, max. 200 words)

The decision for Uppsala University in Sweden is overall driven by my fascination with the Swedish landscape appeals to me as well as the Swedish literature and lifestyle. Also, I have been learning Swedish for about a year and would like to improve my skills. By choosing Uppsala as the location for my studies, I hope to experience a multifaceted stay. As one of the largest cities in Sweden, with many student residents, I expect a lot of intercultural exchange with people my age. In addition, the proximity to the capital Stockholm is another advantage that Uppsala offers. The academic environment of Uppsala University very much speaks to me. The emphasize on international cooperation and the encouragement of critical thinking and active participation in academic research give the impression of a very open-minded university. In addition, I like the idea of the Swedish academic system, as the semester is divided into shorter time periods, in which the students go through an intensive phase of one or two courses each period. I think that this lays an exhaustive focus on the courses themselves. I would really like to experience this system.

## BEWERBUNG

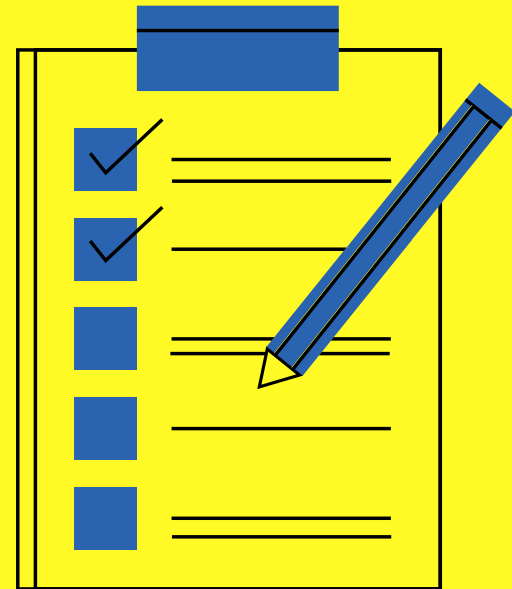

What are your academic plans and expectations for your studies at this partner university? Refer to the course catalogue of the partner university, list courses which are relevant to your major or otherwise beneficial and explain your course selection. If applicable, include extracurricular activities, student societies or university sports.

→ Use full sentences in the selected language of instruction (DE, EN, ES, FR) abroad.

Academic Value  
in main language of instruction  
(full sentences, 200 words)

Uppsala University offers a variety of courses that are applicable for my own studies in Germany, including not only the field of literary studies and linguistics, but also cultural and media studies. Overall, I aim to receive an extended academic view on literature, culture and media in general and English literature in specific, in addition to the German view I gain on it at Siegen University. As for my literary studies, I am for example interested in the courses "Writing American Selves: Fictional and Non-Fictional Self-Portraiture", "World Literatures: Theories, Geographies, Movements" or "English Literature and the Canon: Tradition and Innovation". In the fields of cultural studies, the courses "Feminist Cultural Studies" or "Media and Communication Studies B: European Media Spaces" appeal to me as well, as they provide a specific differentiation of various topics and enable new perspectives on culture and media. In addition, I want to register for Swedish language courses too to become more fluent in the language. Beyond the academic part at Uppsala University, I would like to join Campus 1477, their sports offer for university students. By that I could keep on track with my volleyball training and try new things, like table tennis or basketball.
