

Scientific Writing in the STEM Subjects: Writing Is Easy – Organising It Is Difficult

Prof. Dr. Heiko Ihmels (School of Science and Technology, University of Siegen)

When	Tuesday, 13 June 2023, 13:00-18:00
Where	Campus AR, Building H, Room AR-H 100 Adolf-Reichwein-Straße 2, 57076 Siegen
Organiser	House of Young Talents
Language	English
Intended for	Doctoral and postdoctoral researchers
HYT-Certificate	Communication module (6 AE)

For a research discovery to have a sustaining impact on science, it has to be accessible in the literature in the form of a publication. Consequently, it is a key competence of a well-educated scientist to be able to present scientific results clearly and unequivocally to the scientific community with a well-written, meaningful publication. But especially beginners tend to be hesitant and are even timid of writing their first reports and manuscripts.

Therefore, it will be shown in this hands-on workshop by representative examples and with practical exercises that the organisation and writing of a scientific manuscript can be a straightforward and even pleasant process. Specifically, general conceptual guidelines will be presented for writing and submission of a scientific manuscript, with special focus on publications from STEM subjects. The organisation of the main text as well as the design of graphical and tabular material will be described, and typical rookie mistakes and frequently encountered pitfalls will be addressed. In addition, the review/revision process and special aspects on how to deal with coauthors, editors, and reviewers will be discussed.
