

Master Your Manuscript – Individual Support with Formatting Scientific Documents Using LaTeX

Dr Julian Weiß (House of Young Talents)

When	Individual one-hour appointments in the period from Monday, 20 October 2025, to Friday, 30 January 2026
Where	Campus H, building part C, room H-C 6308 Hölderlinstraße 3, 57076 Siegen On request also possible online via Webex
Organiser	House of Young Talents
Language	English (auch auf Deutsch im Programm, Details dazu finden Sie hier)
Intended for	Doctoral and postdoctoral researchers
HYT Certificate	Methods module (1 AE)

While LaTeX is usually associated with STEM, scholars from other disciplines – those with a sharp eye for aesthetics and clarity – have likewise embraced the advantages of text-based typesetting: clean formatting, precise literature management and professional layouts. However, getting started is often not easy. The first questions arise when setting up the necessary software or selecting suitable templates: Which editor should I use? How do I structure my document? And how can formatting guidelines be implemented technically? Those who do not work with LaTeX regularly quickly lose track – for example, when error messages appear, problems arise with text design, or existing templates need to be adapted.

In this counselling, you will receive individual support in using LaTeX – tailored to your documents and questions. Whether editor settings, bibliographies with BibTeX/BibLaTeX, illustrations or tables: the goal is to confidently use the tools that make LaTeX so powerful for scientific writing. The counselling ranges from technical introductory aids and troubleshooting specific problems to structured planning of longer scientific papers.

Please use the comments field on our registration form to indicate which time period would be suitable for a counselling appointment and briefly describe your specific needs. We will then get back to you with appointment suggestions.

How to register

Please register using our registration form available at
