

(1) Those (of your) papers which you find fundamental for the EUSSET goals. We plan to build a EUSSET resource site, also in Wikipedia, and we would like to have all the important papers in there.

Journal papers

- Avram, G., Wulf, V.,(2011) **Guest editorial: Studying work practices in Global Software Engineering**, Information and Software Technology, Volume 53, Issue 9, Studying work practices in Global Software Engineering, September 2011, Pages 949-954, ISSN 0950-5849.
- Boden, A., Avram, G., Bannon, L. and Wulf, V. (2011), **Knowledge sharing practices and the impact of cultural factors: reflections on two case studies of offshoring in SME**. Journal of Software Maintenance and Evolution: Research and Practice.
- Avram, G., Bannon, L., Bowers, J., Sheehan, A., Sullivan, D. (2009) **'Bridging, Patching and Keeping the Work Flowing: Defect Resolution in Distributed Software Development'**, Special Issue dedicated to 'Software Engineering as Cooperative Work' Guest Edited by Yvonne Dittrich, Dave W. Randall and Janice Singer, **Journal of Computer Supported Cooperative Work**, Volume 18, Numbers 5-6, pp. 477-507

Conference papers

- Boden, A., Avram, G, Bannon, L., Wulf, V. (2009) **'Knowledge Management in Distributed Software Development Teams – Does Culture Matter?'**, ICGSE, pp.18-27, Fourth IEEE International Conference on Global Software Engineering, 2009, Limerick, Ireland
- Sigfridsson A., Avram, G., Sheehan, A. Sullivan, D. K.(2007) **'Sprint-driven development: working, learning and the process of enculturation in the PyPy community'** Third International Conference on Open Source Systems, Limerick, Ireland, June 11-13 2007, Springer, 133-146
- Avram G. ,(2007) **'Of Deadlocks and Peopeware: Collaborative Work Practices in Global Software Development'**, Proceedings of the International Conference on Global Software Engineering 2007, Munich, Germany, 27-31 August 2007, IEEE Computer Society Washington, DC, USA, 91-102

(2) Title and abstract of the contribution/talk you want to make on the symposium. This information helps us to prestructure the presentations and working groups

The topics I am interested in and I could contribute to the discussion about:

1. Challenges of studying work practices in online environments.
How do we combine the study of local practices with that of online practices?
Does the study of online content in isolation offer enough information on associated practices?
2. Studying Social Media practices through CSCW lenses, using concepts like situated action, articulation work, coordination mechanisms, common information spaces for looking at the work performed through Social Media channels.

(3) Your interest in joint research initiatives, specifically those funded by the EU such as IPs, NoEs, STREPS. Which are the topic areas you want to act jointly? What do we need to do to better lobby in Brussels?

Extremely interested in joint research initiatives. Interested in ICT Calls related to: ICT for smart cities, digital content, open access, open data, the Internet of Things.

Personal topic areas: location-based media, social media in work environments and in education, urban environments, open data, crowdsourcing, open hardware, hackerspaces, digital fabrication, wearable computing

(4) Your interest in building joint teaching programs (e.g. interest in joint degrees, exchange of MA or phd students)

As course leader for our undergraduate course in “Digital Media Design”, I am interested in signing Erasmus agreements with universities teaching similar programs. I am also supporting postgraduate student exchanges and a possible collaboration on a Marie Curie Initial Training Networks or Industry-Academia Partnerships and Pathways (IAPP).
