Vorlesungsankündigung für das Wintersemester 2023/2024

Engineering Mechanics

Abstract:

Through the lecture, the students acquire basic knowledge in the field of engineering mechanics, especially for simple models of elasticity theory.

Content:

- Statics, free-body principle, bearing reactions
- Stresses, strains, Hooke's law
- Beam bending, torsion
- Moments, center of gravity, momentum theorem, conservation of energy
- Oscillations of 1-DOF-Systems

Field of Study: Mechatronics**Dates:** Lecture Tuesday, 12:00-14:00, Room PB A-342/1**Start:** Lecture 10.10.2023
