Speaker	Affiliation	Title	Date	Room	Contact
<b>Navid Soltani</b>	University of Siegen	A scanning planar antenna	19 May	Online	Mario Agio
<b>Aysha Awan</b>	University of Siegen	Multiplexed bacterial detection using quantum dot-hairpin DNA conjugates in porous silicon resonant microcavities	26 May	Online	Holger Schönherr
<b>Paulus Aleksa</b>	University of Siegen	Two-dimensional ferroelectrics	2 June	Online	Carsten Busse
<b>Sergey I. Druzhinin</b>	University of Siegen	Probing of nano-environments by time-resolved fluorescence methods	9 June	Online	Holger Schönherr
<b>Madad Abbasli</b>	University of Siegen	Ultrathin films of organic perovskites	16 June	Online	Carsten Busse
<b>Prof. Manuela Killian</b>	University of Siegen	The story of NiO nanosponge	23 June	Online	Manuela Killian
<b>Dipankar Das</b>	University of Siegen	Hydrogels: Synthesis, properties, applications and nano structuring by extrusion	30 June	Online	Holger Schönherr
<b>Kai Mehlich</b>	University of Siegen	Heterojunctions in transition metal dichalcogenides	7 July	Online	Carsten Busse
<b>Prof. Annabel Braem</b>	KU Leuven	Electrophoretic protein deposition	14 July	Online	Manuela Killian
<b>Merle Richter</b>	University of Siegen	Terahertz biosensor for PCR-free DNA detection in relation to tumor marker MIA	21 July	Online	Andreas Bablich
