Raum AE-A 102

Workshop

10.00-12.00

Mobile methods for ethnographic studies of mobile multimedia uses on the move

Lecture/Vortrag

12.00-13.00

Urban mobilities and communication practices

Professor Christian Licoppe has studied the uses of ICTs with a focus on the imbrications of interaction, activity and technology. He has developed research on the uses of the mobile phone, from location aware communities and voice to image (mobile visiophony), as well as ethnographies of the use of ICT in collective work activities.
