# Additional Information about Teacher Training

Very interesting for teacher training:

- > wide range of courses/ programs
- > due to the Norwegian system of teacher training (stronger integration of school and university) also participation in the equivalents of all three phases of teacher training in all types of schools
- > separate department for lifelong learning
- > research programs in many areas of education and school
- > smaller subjects also represented (art, music and skill-based/ technical subjects at BK)

**Thank you for your attention!**
