
Setup with OpenVPN Connect

Downloads

OpenVPN Connect

The OpenVPN Connect App is available [here](#)  .
It works for Windows 10 as well as for Windows 11.

Download OpenVPN Connect v3

sha256 signature: 6e964b3a5e26d40eb8b13c173df7908426babfc04f8d34dce08f9ace84185f0f

For Windows 7, 8, 8.1, and 10.

Profile

Additionally, you will need to download the configuration files [uni](#)  and [admin](#)  (optional). These will have to be imported later.

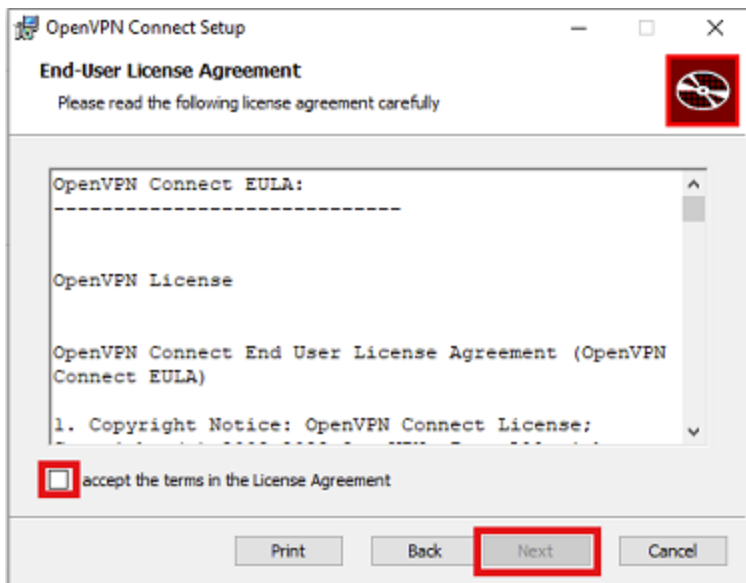

Once you have downloaded everything, the files can be found in your **Downloads** folder.

Installation

Execute the setup file to start the installation process and confirm with „**Next**“ in the window that will open.

Agree to the **License Agreement** by ticking the box next to „I accept the terms in the License Agreement“, and confirm with „**Next**“.

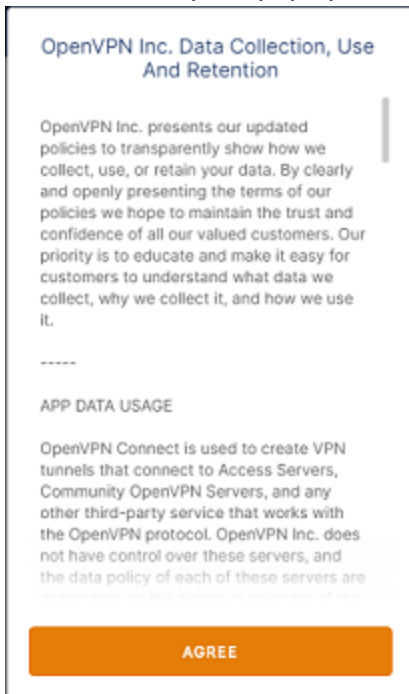

The program will now install the app automatically. Confirm with „**Install**“ to finish the process.

The **OpenVPN Connect** App will then open, enabling you to start the set up process.

Setup

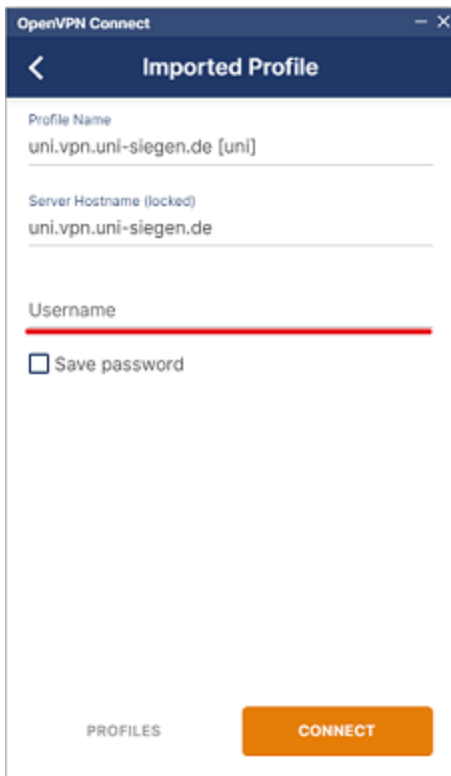

Confirm the request pop-up with „**Agree**“ to start the process.

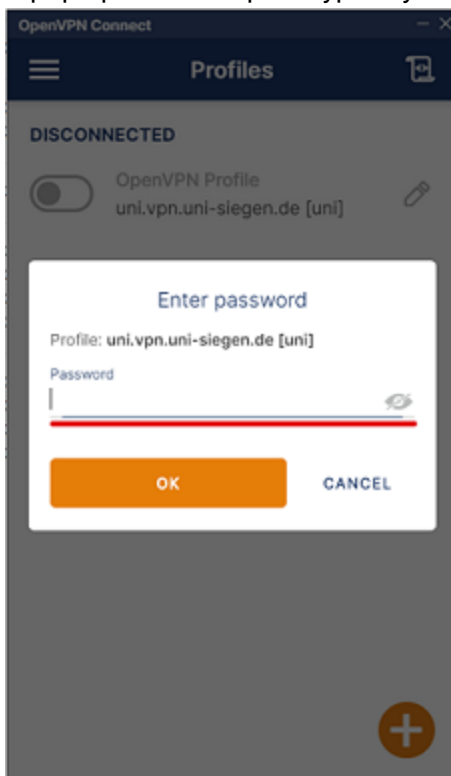

In the next step, you need to import the profile you have previously downloaded. This can be done either via **URL** or via the **File** option.

Chose **File**, click on „**Browse**“, and select the profile you have previously downloaded to import it.

Once the profile is imported, the app will prompt you to provide your username. Do so and click on „**Connect**“ to proceed.

A pop-up will now open. Type in your password and confirm with „OK“.

Once you have provided the **correct** information, the app will establish a connection.
