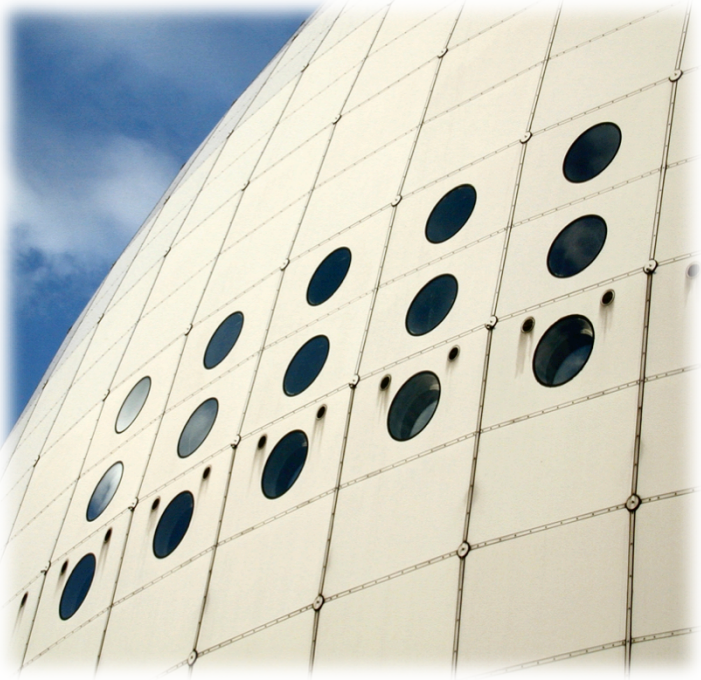
HANDISAM



Main tasks

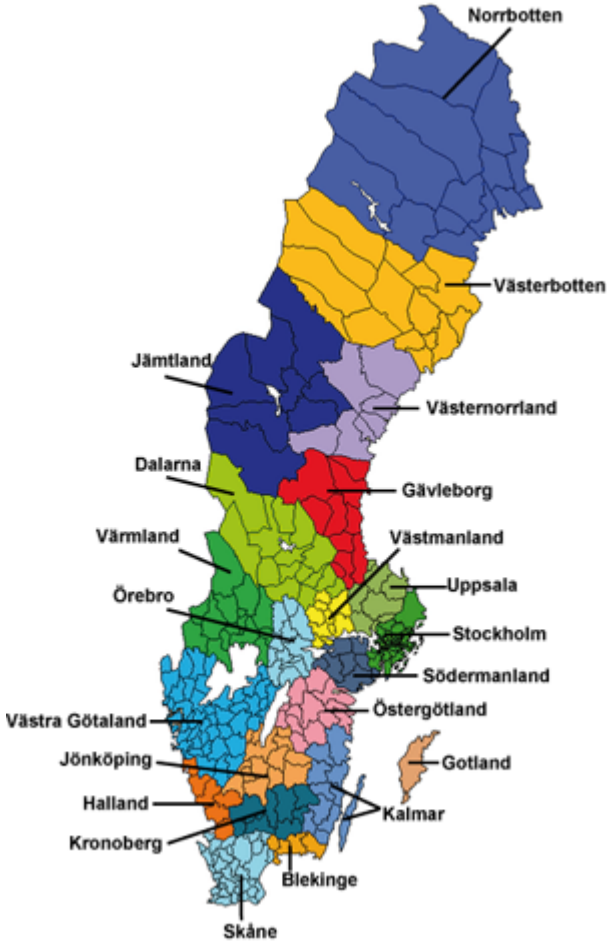
- Monitoring
- Promote implementation of disability policy
- Support accessibility

Accelerate the development towards a society where everyone can participate equally regardless of ability to function.

HANDISAM

A strategy for the implementation of the disability policy 2011 - 2016

HANDISAM



Follow-up the CRPD in the municipalities

HANDISAM

background

- Assignment from the government in 2011
- Suggestions for implementation in 2012
- New assignment - reported in May 2014

What should we accomplish?

- A system that annually presents indicators from municipalities and counties in eight areas and ...
- move towards activities ...
- accessible for all and that creates opportunities for participation in all parts of society.

HANDISAM

conditional grants

Recruitment of trainees
Handball for all

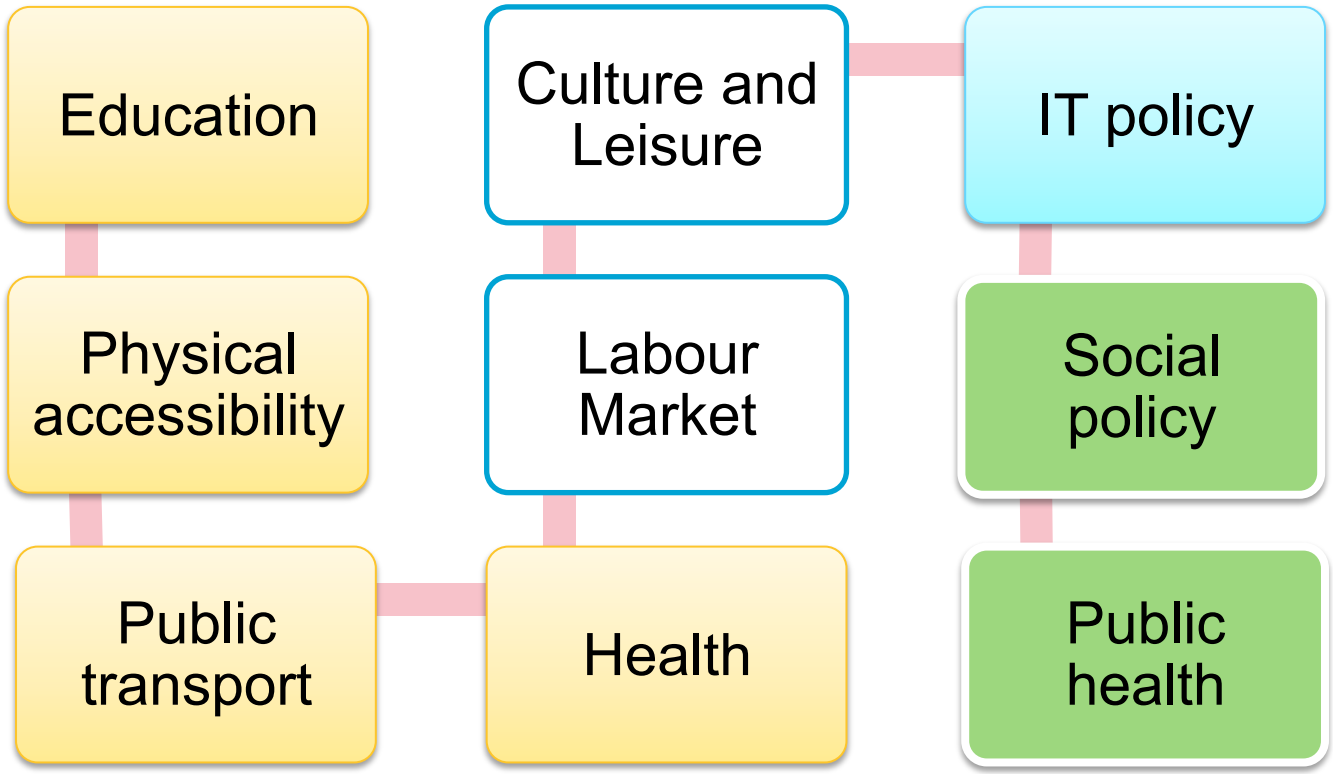
Unemployment activities available to all

What should be monitored?

- Structure that promotes accessibility and participation
- What municipalities do to increase participation
- Operations work on accessibility
- **Action and results**
- Examples of good practice

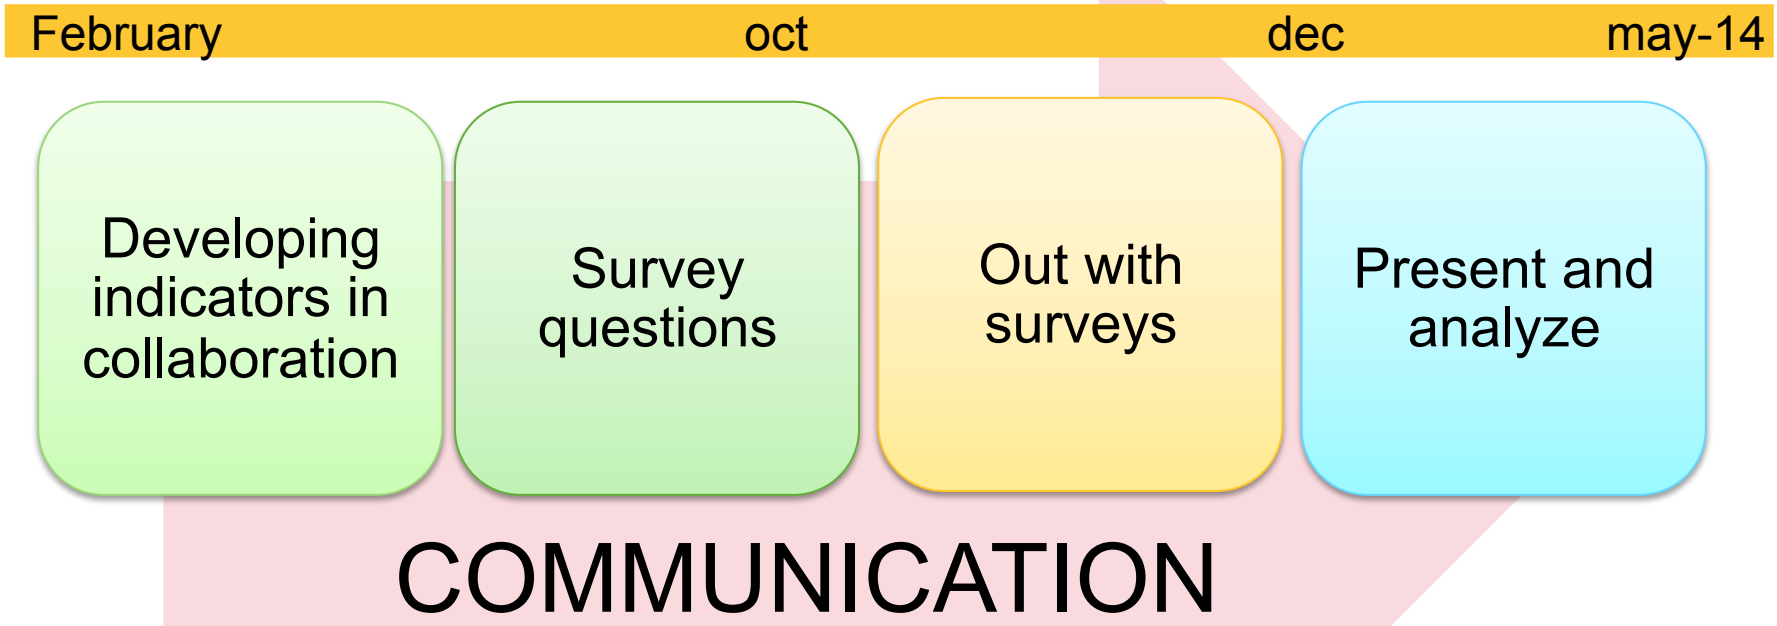
HANDISAM

Monitoring Areas & working groups



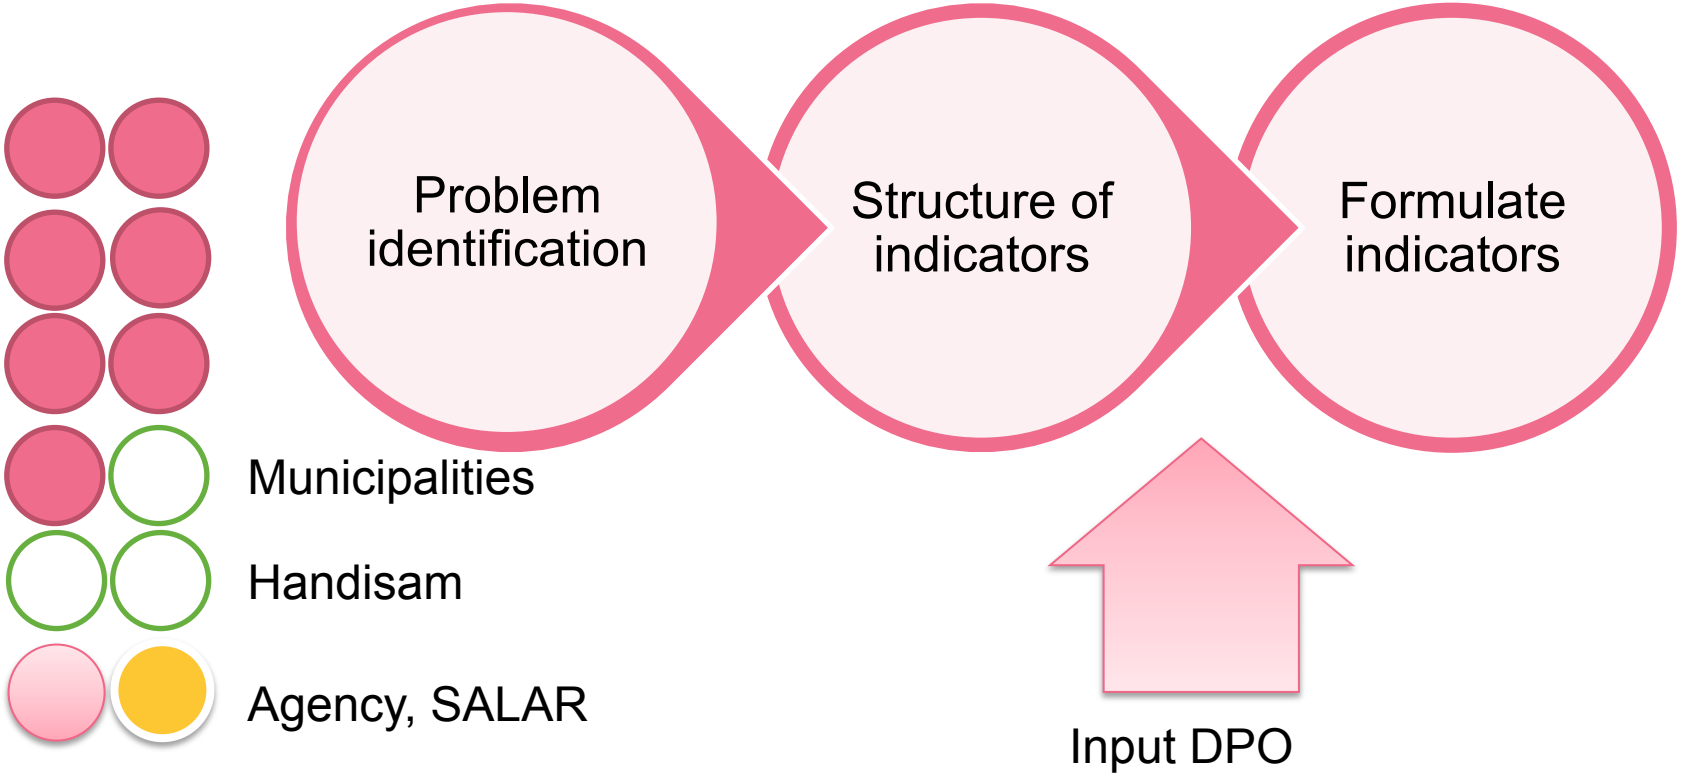
HANDISAM

Work process



HANDISAM

Developing indicators in collaboration



HANDISAM

The key to success - Communication

HANDISAM

As a basis for indicator structure

- UNCRPD
- Swedish Government strategy 2011 – 2016
- OHCHR, Indicators on human rights
- Outcome working groups
- Previous surveys to municipalities

HANDISAM

Some data on the situation in the municipalities

Labour market

- 64 percent of municipalities have employed people with disabilities after completing internships.
- To get more persons with disabilities employed, 64 percent of municipalities collaborate with secondary education and 73 percent with business.

Education

- In 14 percent of the municipalities both public and private schools have been inventoried in terms of physical accessibility.

Culture and Leisure

- 95 percent of the libraries in the municipalities are accessible.
- Four out of five municipalities collaborate with disability organizations on cultural and sports activities.
- There are 20 percent of the municipalities that require accessibility in grants to sporting activities.
